

THE READER NEST

Learning Management & Virtual Classroom Platform

Proposal for a white-label EdTech ecosystem covering live classes, admissions, parent experience, billing, teacher operations and analytics.

Project Scope Overview

The objective is to build a white-label Learning Management and Virtual Classroom platform that allows The Reader Nest to manage live classes, scheduling, admissions, parent engagement, teacher operations, billing, analytics and content access from a single integrated system.

Live Teaching

Classroom, audio/video, screen share and whiteboard

Business Operations

Admissions,enrollment, scheduling and billing

Learning Experience

Parent dashboard, worksheets, recordings and progress

Governance

Admin controls, permissions, dashboards and ownership

High-Level Understanding

Digital Teaching Platform

The platform is intended to support online classes through live audio/video, interactive whiteboard, classroom controls, recordings, attendance and session summaries. This moves The Reader Nest from simple meeting links to a controlled teaching experience.

Operational Backbone

The system must also handle admissions, demo scheduling, parent enrollment, batches, academic calendar, teacher leave, fee suspension, payments, invoices and tutor payout rules. This makes it an ERP-style learning operations system.

Owned Product

The client expects full source code ownership, white-label branding, client-controlled repository, cloud ownership, API ownership, documentation and complete handover.

Admin Portal

Central command centre for academic, operational and financial control

01

Admin Portal

USER ROLE

Admin is responsible for configuring and supervising the full platform across users, courses, batches, payments, content, reports and governance.

What this user manages

- Parent, student, teacher and team users
- Courses, batches, schedules and calendars
- Payments, invoices, receipts and departments
- Learning resources, recordings and permissions
- Dashboards, analytics and exports

Core capabilities

User Control

Batch Setup

Finance

Reports

Business value

The Admin Portal gives Reader Nest a single operating console to plan classes, control learning access, monitor business performance and keep the academic operation consistent across all departments.

Academic Calendar

Access Control

Resource Visibility

Business KPIs

Sub Admin Portal

Permission-based operational access for internal teams

02

Sub Admin Portal

USERROLE

Sub Admins support daily operations with restricted access based on responsibilities defined by the main Admin.

What this user manages

- Assigned modules and menu access
- View, add, edit or approve permissions
- Department or role-specific workflows
- Controlled access to sensitive records
- Accountability for delegated tasks

Core capabilities

Custom Access

Limited Views

Task Control

Secure Ops

Business value

This role helps Reader Nest distribute operational workload without exposing full admin rights, improving security, accountability and team efficiency.

Module Permissions

Action Permissions

Audit-friendly

Internal Control

Admission Team Portal

Demo scheduling, parent follow-up and conversion management

03

Admission Team Portal

USERROLE

The Admission Team manages the demo-to-enrollment pipeline, including demo bookings, teacher feedback, parent follow-up, payment status and conversion updates.

What this user manages

- One-time demo scheduling
- Teacher demo feedback review
- Parent details and contact records
- Payment links and payment status
- Conversion pipeline and enrollment status

Core capabilities

Demo CRM

Follow - up

Payment Links

Conversion

Business value

The Admission Portal acts as a lightweight CRM that helps the business track leads clearly, convert demo participants into enrolled students and maintain complete visibility of payment and enrollment progress.

Demo Completed

Partially Paid

Enrolled

Not Interested

Teacher Portal

Liveclassdelivery,whiteboardactivitiesand student engagement

04

Teacher Portal

USER ROLE

Teachers use the portal to conduct classes, manage sessions, use live classroom tools, submit demo feedback, apply leave and track assigned academic activities.

What this user manages

- Upcoming classes and assigned batches
- Live class launch and student controls
- Interactive whiteboard and class resources
- Mandatory demo feedback submission
- Leave requests with 6-hour rule

Core capabilities

Live Class

Whiteboard

Quiz

Feedback

Business value

The Teacher Portal enables a two-way, interactive learning experience with tools for teaching, engagement, attendance, feedback and classroom management.

Attendance

Resources

Leave

Student Control

Parent Portal

Singledashboardforchildlearning,payments and communication

05

Parent Portal

USER ROLE

Parents use the portal to complete child enrollment, viewschedules,joinclasses,

access worksheets, view recordings and manage payments for multiple children .

What this user manages

- Mandatory child enrollment form
- Multiple children under one account
- Classes completed and remaining
- Attendance percentage and fee status
- Worksheets, recordings and reports

Core capabilities

Enrol l me nt

Schedule

Pay Now

Repo rts

Business value

The Parent Portal keeps parents informed and engaged by showing academic progress, attendance, fee status, resources and upcoming sessions in one place.

Multiple Kids

W orks h ee ts

Recordings

Fee Status

Student Experience

Interactive, measurable and child-friendly digital learning

07

Student Experience

USERROLE

Students participate through the parent account and engage with live classes, quizzes, whiteboard activities, chat, reactions and gamified rewards.

What this user manages

- Instant class joining
- Mic/video participation
- Whiteboard interaction and answers
- Live quiz attempts and scoring
- Stars, badges and celebrations

Core capabilities

Raise Hand

Chat

Quiz

Rewards

Business value

The student experience is designed to make online reading and learning active, measurable and enjoyable rather than one-way streaming.

Drag & Drop

Hotspots

Badges

Engagement

Academic Coordinator

Calendar-driven coordination of sessions, teachers and batch planning

08

Academic Coordinator

USERROLE

Academic Coordinators support day-to-day scheduling, rescheduling, teacher availability checks, holiday visibility and academic calendar monitoring.

What this user manages

- Centralised academic calendar
- Teacher and student/batch scheduling
- Session status colour coding
- Holiday and leave visibility
- Conflict-free schedule management

Core capabilities

Calendar

Reschedule

Availability

Status

Business value

This role ensures smooth academic operations by keeping class plans, teacher availability, session status and calendar changes visible to the right users.

Holiday

Leave

Management Dashboard

09

Management Dashboard

USERROLE

Management users need executive-level dashboards to monitor enrollments, revenue, utilization, conversion, attendance and course performance.

What this user manages

- Total and active students
- Revenue and course-wise income
- Enrollments and conversion rates
- Teacher utilization and attendance
- Renewals, refunds and batch occupancy

Core capabilities

Revenue

Conversion

Utilization

Occupancy

Business value

The Management Dashboard helps owners and senior stakeholders make data-driven decisions by turning admissions, academic and financial data into clear business insights.

Renewals

Refunds

Course Revenue

Common Platform Layer

10

Common Platform Layer

USERROLE

The platform layer connects authentication, roles, notifications, scheduling, payments, resources, analytics, AI reports and white-label ownership across all portals.

What this user manages

- Role-based authentication and permissions
- Email reminders, alerts and bulk mail
- Session recordings and resource access
- Billing, payments and receipts
- AI analytics, reports and CSV exports

Core capabilities

RBAC

Notifications

Billing

Analytics

Business value

The common platform layer ensures Reader Nest can operate as a fully owned white-label EdTech ERP and LMS with scalable workflows, controlled access and complete handover readiness.

Reader Nest WBS Overview

Module-wise work breakdown for the LMS, live classroom, admissions, billing and analytics platform.

A

Admin Portal

- User, batch and course control
- Academic calendar and content access
- Finance, reports and permissions

D

Admission Team

- Demo scheduling and tracking
- Feedback and follow-up management
- Payment links and conversions

T

Teacher Portal

- Live class delivery
- Whiteboard and activities
- Attendance, leave and feedback

P

Parent Portal / App

- Child enrollment and dashboard
- Class access and resources
- Payments, invoices and recordings

L

Live Learning Layer

- Live video/audio classroom engine
- Interactive whiteboard tools
- Gamification and engagement tracking

B

Business Operations

- Scheduling and academic calendar
- Billing, subscriptions and tutor payout
- Attendance, no-show and fee suspension

O

Platform Ownership

- White-label branding and domain
- Client-owned repository and source code
- API, cloud and documentation handover

WBS Scope: Admin, Sub Admin, Admission, Teacher, Parent, Live Classroom, Scheduling, Billing, Analytics, White-label and Handover.

WBS —Admin Portal

Operational control centre for users, batches, sessions, content, payments and reporting.

1

Authentication & User Control

- Admin login, logout and secure access
- Parent, student and teacher management
- Admission team and sub-admin management
- Role assignment and permission control
- User status management

2

Dashboard & KPIs

- Total and active students
- Revenue and enrollments
- Conversion and renewal rates
- Teacher utilization and attendance
- Refund rate and batch occupancy
- Course-wise revenue

3

Course & Batch Management

- Create/edit/archive batches
- Course categories and pricing
- Class duration configuration
- Individual and group course setup
- Batch capacity and assignments
- Active and dormant batches

4

Session & Calendar Management

- Schedule sessions
- Reschedule / cancel
- Academic calendar
- Holiday calendar
- Teacher leave calendar
- Colour status codes

5

Content & Access Management

- Reading book upload
- Worksheet upload
- Resource management
- Parent dashboard visibility
- Download permission control
- Recording access control

6

Billing & Finance

- Packages and subscriptions
- Auto invoices and receipts
- Recurring payments
- Department-wise payment mapping
- Refund and fee tracking
- Tutor payout visibility

7

Reports & Communication

- Student and teacher reports
- Attendance and revenue reports
- Performance reports
- CSV exports
- Bulk email to active students
- Batch-wise bulk email

8

Enrollment & Governance

- Enrollment review
- Approve/edit/download forms
- Tutor notes
- Session reports
- Permission governance

WBS —Sub Admin & Access Control

Configurable access layer for delegated operations across specific modules and reports.

1 Sub AdminAuthentication

- Sub-admin login
- Secure access validation
- Assigned dashboard access
- Logout

2 Permission Management

- Module-wise access assignment
- Feature-level permission control
- View/add/edit/delete restrictions
- Role-wise dashboard visibility

3 Assigned Operations

- Access assigned operational modules
- Work only within permitted scope
- View assigned reports
- Support admin-defined workflows

4 Access Boundaries

- No full system access by default
- Access changes controlled by Admin
- Sensitive finance access permission-based
- Reports visibility controlled by role

5 Audit & Control

- Track key user actions
- Support accountability by module
- Maintain operational control
- Enable secure delegation

6 Outcome

- Controlled administration
- Reduced dependency on main Admin
- Clear responsibility split
- Scalable internal operations

WBS —Admission Team Portal

Democlassmanagement,parentfollow-up,paymenttrackingandenrollment conversion workflow.

1

Authentication& Dashboard

- Admission team login
- Admission dashboard
- Demo booking overview
- Conversionstatussummary
- Payment status visibility

2

Demo Management

- Schedule demo class
- One-time demo session
- Flexible parent invite
- Multipleparentparticipation
- Demo status tracking

3

Demo Feedback Review

- View teacher feedback
- Child academic level
- Strengths and improvement areas
- Recommended course
- Suggested batch type
- Teacher remarks

4

Parent&Enrollment Trac ki n g

- Parent details
- Contact information
- Enrollment status
- Follow-upstatus
- Conversion status

5

Payment Tracking

- Payment link sharing
- Payment status: pending / paid / partial
- Transaction history
- Receipt visibility
- Department-wise payments

6

Conversion Management

- Demo completed
- Follow-up in progress
- Enrolled
- Not interested
- Conversion funnel tracking

7

Centralized Reporting

- Demo feedback reports
- Payment reports
- Enrollment reports
- Conversion reports
- Follow-up visibility

WBS —Teacher Portal

Teacher-facing classroom delivery, leave, feedback, resources, attendance and engagement operations.

1

Authentication & Dashboard

- Teacher login / logout
- Today's classes
- Upcoming sessions
- Completed sessions
- Teacher dashboard

2

Live Classroom Delivery

- Start live class
- Live audio and video
- Screen sharing
- Waiting room
- Mute/unmute students
- Resource upload

3

Interactive Whiteboard

- Infinite whiteboard
- Multi-page board
- Drawing, text and shapes
- Sticky notes
- Drag & drop
- Tag & match
- Hotspot activities

4

Engagement & Gamification

- Live quizzes
- Instant scoring
- Badges and stars
- Milestones
- Celebrations
- Leaderboards

5

Attendance & Session Records

- Student attendance
- Session attendance
- Session recording
- Session summary
- Class history

6

Demo Feedback

- Mandatory demo feedback
- Academic level observation
- Recommended course
- Batch recommendation
- Additional remarks

7

Leave Management

- Apply leave from portal
- 6-hour restriction rule
- Leave history
- Leave status
- Admin approval / rejection

8

Teacher Performance

- Tutor notes
- Session reports
- Attendance records
- Performance view

WBS —Parent Portal

Parent-facing experience for child enrollment, live classes, resources, fees and progress visibility.

1

Authentication & Child Enrollment

- Parent login / logout
- First login enrollment form
- Child details submission
- Mandatory form completion
- Enrollment status view

2

Parent Dashboard

- Multiple child profiles
- Classes completed
- Classes remaining
- Attendance percentage
- Fee status
- Learning timeline

3

Session Access

- Schedule view
- Join live class
- Class notifications
- Attendance updates
- Progress updates

4

Resources & Recordings

- Reading books access
- Worksheet download
- Recording view only
- 15-day recording access

5

Payments & Billing

- Invoice view
- Receipt view
- Payment history
- Pay Now access
- Fee suspension popup

6

Notifications & Reports

- Session reminders
- Attendance updates
- Performance summaries
- Payment reminders
- Automated reports

WBS —Live Classroom, Whiteboard & Gamification

Core learning experience covering real-time teaching, smart board activities and learner motivation.

1 Live Classroom Engine

- Live video and audio
- Screen sharing
- Two-way interaction
- Chat and reactions
- Raise hand
- Mic/video participation
- Instant join

2 Teacher Controls

- Mute/unmute child
- Video permission control
- Remote access
- Whiteboard access control
- Waiting room
- Class launch controls

3 Whiteboard Tools

- Infinite board
- Multi-page board
- Drawing tools
- Shapes and text
- Sticky annotations
- Teacher-controlled interaction

4 Interactive Activities

- Drag & drop
- Tag & match
- Hotspot clicks
- Select correct answer
- Direct board responses

5 Gamification Layer

- Live quizzes
- Instant scoring
- Stars and badges
- Leaderboards
- Milestones
- Reward moments

6 Celebration Features

- Celebration animations
- Birthday celebrations
- Dhol sound effect
- Clapping sound effect
- Recognition moments

7 Session Records

- Auto session recording
- Cloud recordings
- Long-duration sessions
- Session summaries
- Session history

WBS —Scheduling, Calendar, Attendance & No-Show

Scheduling operations, automated attendance, leave handling and carried-forward session logic.

1 Scheduling Engine

- 1:1 class scheduling
- Group class scheduling
- One-time demo booking
- Automated scheduling
- Intelligent rescheduling
- Multi-timezone support

2 Calendar Management

- Central academic calendar
- Admin, Coordinator and Teacher views
- Colour-coded statuses
- Holiday and teacher leave visibility
- Real-time session overview

3 Reminders & Alerts

- Booking confirmations
- Email reminders
- No-show alerts
- Delayed session alerts
- Payment reminders
- Session notifications

4 Attendance Automation

- Teacher attendance
- Student attendance
- Session attendance
- Login/join-based capture
- Attendance reports

5 No-Show Handling

- Teacher no-show capture
- Student no-show capture
- Session carried forward
- No-show status code
- Admin visibility

6 Teacher Leave Rules

- Teacher leave application
- 6-hour leave restriction
- Auto restriction if below 6 hours
- Admin approval/rejection
- Calendar update

7 Teacher Payout Impact

- Student no-show waiting amount
- Teacher no-show deduction
- Penalty configuration
- Final pay calculation
- Payout reports

8 Course Completion

- Completion tracking
- Batch completion
- Dormant batch move
- Recording expiry timer

WBS —Billing, Fee Suspension, Analytics & Reporting

Financial operations, department payment accounts, fee control and business intelligence dashboards.

1 Packages & Subscriptions

- Package setup
- Subscription plans
- Session-based charging
- Recurring payments
- Auto billing

2 Invoices & Receipts

- Auto invoice generation
- Receipt generation
- Payment history
- Fee status update
- Transaction history

3 Payment Gateway Mapping

- Two payment accounts
- Phonics department mapping
- Maths department mapping
- Department-wise transaction recording
- Central dashboard visibility

4 Fee Suspension

- Fee overdue check
- Account suspension
- Pending fee popup
- Pay Now redirect
- Access restoration

5 Student Analytics

- Attendance metrics
- Participation metrics
- Quiz attempts
- Whiteboard interaction
- Engagement scores
- Learning outcomes

6 AI Reports

- AI performance reports
- Student progress insights
- Talk-time analysis
- Camera attentiveness
- Session completion

7 Admin BI Dashboard

- Revenue and enrollments
- Conversion and renewal rates
- Teacher utilization
- Attendance rates
- Batch occupancy
- Course-wise revenue

8 Exports & Reports

- CSV exports
- Attendance reports
- Revenue reports
- Payout reports
- Conversion reports

WBS —White Label, Ownership, Integrations & Handover

Client-owned white-label product with controlled branding, documentation and operational handover.

1 White Label Branding

- Reader Nest branding
- Own domain configuration
- Integrate into existing website/app
- White-label Android app
- White-label iOS app

2 Ownership Requirements

- Complete source code ownership
- Repository under client account
- Admin access
- API ownership
- Cloud ownership

3 Integrations

- Open source Video/Audio Call integration
- Payment gateways
- Calendar sync
- CRM integrations
- Email/SMS reminders

4 Documentation & Handover

- Full technical documentation
- API documentation
- Admin guide
- Handover included
- Repository access

5 Operational Readiness

- Role-wise access readiness
- Academic operations readiness
- Billing operations readiness
- Reporting readiness

6 Final WBS Outcome

- A scalable LMS + classroom + ERP platform
- Clear module ownership
- Structured implementation scope
- Estimation-ready WBS
