

SOFTWARE REQUIREMENT FOR THE READER NEST

We can integrate zoom as it is or if possible the audio video can be made by company too with below features-

1. LIVE Classroom Engine (Core) - The actual virtual classroom.

Teacher side

- Live video
- Live audio
- Screen share
- Digital whiteboard
- Draw / annotate
- Mute/unmute the child

Student side

- Join instantly
- Raise hand
- Mic/video participation
- Real-time responses
- Chat + reactions
- Ask doubts

Two-way interaction rather than one-way streaming.

2. Interactive Whiteboard System- This is one of the biggest differentiators.

Features:

- Infinite whiteboard
- Multi-page board
- Drawing tools
- Shapes
- Text tools
- Sticky annotations
- Teacher-controlled interactions
- Teacher can write while students interact
- Drag & Drop
- Tag & Match
- Hotspot clicks (teacher makes areas clickable)
- Select correct answer directly on board

3. Gamification Layer- Designed to increase participation.

Features:

- Live quizzes

- Instant scoring
- Leaderboards
- Milestones
- Stars
- Badges
- Celebration animations
- Reward moments
- Birthday celebrations
- Dhol / clapping sound effects for recognition

4. Student Engagement Tracking (Very Advanced)-

Measures:

- Participation
- Click activity
- Quiz attempts
- Whiteboard interaction
- Attention signals
- Engagement scores
- Learning outcome indicators
- One-click Join Session
- Teacher start class from dashboard
- Student join from portal
- No manual meeting links
- Auto session recording
- Cloud recordings
- Long-duration sessions
- Attendance automation
- Session summaries
- Live class launch controls
- Session history

Teacher controls:

- Mute students
- Control video permissions
- Give remote access
- Allow whiteboard access
- Waiting room
- Uploaded resource

5. Scheduling + Operations (Very Strong)

- 1:1 class scheduling
- Group classes

- Session/demo booking by parent themselves(please note this would be only one time sessions not recurring)
- Automated scheduling
- Intelligent rescheduling
- Calendar sync
- Multi-timezone support
- Booking confirmations

Automations:

- Email reminders
- No-show alerts
- Delayed session alerts

6. Admin Account

Features:

- Multiple teacher management
- Admin roles
- Permission controls
- Assign teachers to batches
- Tutor dashboards
- Performance tracking
- Tutor notes
- Session reports

7. Parent Experience

Student features:

- Schedule view
- Learning timeline
- Teaching resources/ worksheet access(downloadable)
- Recording access(only view)
- Notifications

Parent/business side:

- Automated reports
- Attendance updates
- Performance summaries

8. Analytics + AI Layer

focuses heavily on analytics.

Metrics include:

- Attendance

- Engagement
- Participation
- Talk-time
- Camera attentiveness
- Session completion
- Student progress
- AI performance reports
- CSV exports

9. Billing + Business Management

Operational features:

- Invoicing
- Packages
- Subscription plans
- Auto billing
- Recurring payments
- Tutor payouts
- Session-based charging

10. Branding / White Label

Business features:

- Own branding
- Own domain
- Integrate into your website/app
- White-label Android app
- White-label iOS app
- CRM integrations

The platform should work as:

1. Admin Portal
2. Sub admin Portal
3. Admission Team Portal (only to schedule one time demo classes link, and it should be flexible for more than one parent to join)
4. Teacher Portal
5. Parent Portal
6. Parent Mobile App(if possible)

Required Ownership:

- Complete source code ownership
- Repository under client account
- White-label product
- Admin access

- **API ownership**
- **Cloud ownership**
- **Full documentation**
- **Handover included**

Other Pointors-

- Let the admin dashboard show active batches (which are running at the moment) and dormant batches (which are finished)
- All reading books and worksheets to be uploaded on erp for easy access to parents only worksheets to be downloaded but giving access should only be given by admin to be visible on the parent dashboard.
- Class recordings access only 15 days after batch finish and automatically delete the student dashboard after 15 days.
- Bulk mail feature to all active students as well as bulk mail option for per batch.
- Add penalties/deduction for teachers if any should be added
- No show from child should add up a waiting amount to teachers final pay scale
- If no show in any particular session from the teacher(host) as well as student (participant) the session should automatically be carried forward
- Define class duration (30 min, 45 min, 60 min)
- Course completion tracking
- One dashboard should have multiple kids options as parents also get siblings enrolled so there should be just 1 dashboard where the parent can see all their kids
- Parent Dashboard should show:-Classes completed, Classes remaining, Attendance %, Fee status.
- Auto invoices, Receipt generation
- The LMS should include a centralized, color-coordinated academic calendar that provides Admins, Academic Coordinators, and Teachers with a real-time overview of all scheduled activities across the organization.
- Each session should be displayed in a specific color based on its status to enable quick identification. For example, scheduled sessions may appear in yellow, completed sessions in green, cancelled sessions in red, and no-show sessions in blue. Different colors may also be assigned to demo classes, rescheduled sessions, holidays, and teacher leaves.

Admin should see:

- Total students
- Active students
- Revenue
- Enrollments
- Conversion rates
- Teacher utilization
- Attendance rates
- Renewal rates

- Refund rate
- Batch occupancy
- Course-wise revenue

1. Parent Self-Enrollment Form

Once the admin creates a parent account on the portal, the parent should receive login credentials and be required to complete the child's enrollment form upon first login.

- The enrollment form should be mandatory before accessing the dashboard.
- Parents should fill in all child-related information themselves.
- The list of fields/details for the enrollment form will be provided separately by me.
- Admin should be able to view, edit, approve, and download the submitted enrollment forms.

2. Teacher Leave Management System

A leave application module should be integrated into the teacher dashboard.

Teachers should be able to apply for leave directly through the portal.

- Leave requests must be submitted at least **6 hours before the scheduled session time**.
- The system should automatically restrict teachers from applying for leave if less than 6 hours remain before the class.
- An appropriate notification/message should be displayed if a teacher attempts to apply within the restricted timeframe.
- All leave applications should be visible to the admin for approval or rejection.

3. Fee Due Suspension Feature

The LMS should have an automatic fee-default management system.

- If a parent's fee remains unpaid beyond the due date, the admin should be able to temporarily suspend the student's account.
- Suspended parents and students should not be able to join live sessions or access course content.
- Whenever a suspended user logs in, a pop-up notification should appear stating that the fee payment is pending.
- The pop-up should contain a prominent **"Pay Now"** button redirecting the parent to the payment gateway.
- Once payment is successfully received, account access should be restored automatically or by admin approval.
- A notification also comes to the admin account about the same, that so n so parent has paid the due amount

4. Multiple Payment Gateway Integration

The platform should support integration of **two separate payment accounts**.

- One payment account will be used for the **Phonics Department**.
- The second payment account will be used for the **Maths Department**.
- Admin should have the flexibility to assign each parent/student to the appropriate payment account based on the course enrolled.
- All transactions should be recorded separately department-wise while remaining visible in a centralized admin dashboard.

5. Demo Class Feedback Form

A dedicated demo feedback form should be integrated for teachers.

- Immediately after every demo class, teachers should be required to submit a demo feedback form.
- The form should capture observations such as:
 - Child's current academic level.
 - Strengths and areas of improvement.
 - Recommended course.
 - Suggested batch type (individual/group).
 - Additional remarks and observations., etc
- Submission of the feedback form should be mandatory before closing the demo session.

6. Admission Team Access & Centralized Reporting

The admission team should have access to all demo and payment-related information through a centralized dashboard.

The dashboard should allow the admission team to view:

- Demo feedback form responses submitted by teachers.
- Recommended courses for each child.
- Parent details and contact information.
- Payment links shared with parents.
- Payment status (Pending/Paid/Partially Paid).
- Transaction history and receipts.
- Department-wise payment records.
- Enrollment status.
- Conversion status (Demo Completed/Follow-up/Enrolled/Not Interested).
- They should be able to schedule demos over there irrespective of time, date and no. of people.

TEACHER PAYOUT CALCULATION

- Once the class is done, the system automatically calculates the payout and add it to there respective dashboard
- The admin can view each teachers payout personally
- Only the admin should be able to see the payout of all teachers.
- Rest each teacher can see their own payouts only.
- The admin Should be able to add different payout to different duration of batches teacher-wise
- This should be calculated monthly and sent to their mail, every new month start fresh calculation
- The previous record should be intact
